**THE FACTS ON SCHOOL FUNDING IN NSW**

School funding can be a confusing and contentious topic – so it’s important that parents and school communities know the facts.

This leaflet explains how and why governments fund all not-for-profit schools, including Catholic schools.

## Key statistics (2018)

Catholic schools educate 1 in 5 students

Catholic schools have educated Australian students for almost 200 years

### The cost of a school education

The average cost of educating a child – in a government or non-government school – is more than $13,000 a year. That would be a huge cost for most Australian families, especially if they have two or more children.

This is why state and federal governments provide some funding to all not-for-profit school sectors.

### How government funding is calculated

Funding for all schools in all sectors is calculated using the same needs-based measure – the Schooling Resource Standard (SRS).

Each school’s SRS is calculated according to the needs of its students, starting with a base amount (in 2019, it is $11,343 per primary student or $14,254 per secondary student) plus extra funding for six types of disadvantage.

So a primary school educating many disadvantaged students may have an SRS of more than $17,000 per student, while another educating highly advantaged students may have an SRS of less than $12,000 per student.

The SRS is a funding target and was introduced in 2014. For many state and territory governments, it represents a big jump in their school funding commitments; they are the majority funders of public schools which educate two-thirds of all students – so meeting the SRS is a large commitment for state and territory governments and is therefore being phased in over several years with Federal assistance.

Catholic school communities, on average, contribute some 30% of the cost of educating their students. The remaining 70% is covered by a combination of State and Federal government funding.

Without this government funding support, Catholic systemic schools would need to charge parents more than $13,000 a year to educate their child. This would put a Catholic education out of reach for most Australian families, forcing them onto the public schools sector which is already at capacity.

In 2016, NSW Catholic school communities paid $1.17 billion in fees and $316.5 million in capital funding to support their schools. This represents a significant saving to taxpayers, who provided $2.76 billion in recurrent funding and $34.3 million in capital funding.

Who pays the SRS

In public schools, the SRS is funded solely by state and territory governments; parents are not required to contribute.

In Catholic and other non-government schools, state and territory governments fund 20-90% of the SRS base amount according to a means test of the school’s parents, who are expected to make up the shortfall. The more parents can afford to pay, the less public funding a non-government school attracts.

IT’S A FACT

- Funding for all students in all school sectors is calculated using the same needs-based measure – the Schooling Resource Standard (SRS)
  - In public schools, the SRS is solely funded by taxpayers
  - In Catholic and other non-government schools, parents must pay part of the SRS according to an assessment of their ability to pay
  - Public school funding has never been cut to fund Catholic schools. Funding for public schools has risen every year in line with enrolments and indexation
- Catholic education supports a strong, properly funded public schools sector
  - Public schools exist in hundreds more towns and suburbs than Catholic schools and therefore are the only option for many families
  - One in six public school students comes from a Catholic family
- Catholic school parents are also taxpayers and deserve a fair share of government funding support to keep their children’s schools affordable
  - By keeping Catholic schools affordable, one in five Australian children can attend a school that reflects their parents’ values and beliefs – an important feature of a pluralist society
- Catholic schools save taxpayers money; without affordable Catholic schools, taxpayers would need to fund 100% of the cost of educating more than a quarter of a million NSW Catholic school students, instead of just 70%
